**Date:** Wednesday 5 October
**Time:** 14:00-15:00 CEST, 13:00-14:00 BST

**Present:** Rickard, Jerry, Sion, John, Patrik, Nick, Sara, Matthijs

1. **Who will write minutes?**
   Patrik.

2. **Agree on the agenda**
   Ok.

3. **Action points**
   None.

4. **Updates OpenDNSSEC**
   Signer: couple of bug fixes from the users list, nothing else.
   Adapters: Implemented NSD similar network dispatcher, handles expired, backup … finished most of the ground work. Now busy with transfer. No real transfers to commit yet. Maybe for the next meeting.

5. **Updates Enforcer NG**
   Updates coming the following days on the mailinglist. No comments from users on the alpha release.
   Key rollovers are not yet clear enough.
   Automatic introduction of ManualRollover marked keys.
   "waiting for user input until introducing new ask", it's on Yuri's list to make Enforcer-ng more similar to the old Enforcer.
   2nd alpha, Yuri will suggest something on the list the next coming days.
   Nick has implemented the test scenario script. Still working on file comparison control mechanism. Test is working. Can add more scenarios easily.

6. **Updates SoftHSM**
   Follow up on earlier discussions on building for FreeBSD.

7. **Testing**
   *Jenkins*
   John has made separate test for Jenkins. "make check" for all components. In the process of moving commands to files for Jenkins. Have all current checks running. Some needs tweaking for the Jenkis environment. Also moved Jenkis to https. Issues are sent to Jira, when it works.
   Working on planning more sophisticated tests.
   Rickard wonders why SoftHSM takes 57 minutes for Jenkins to test. John will look at that.

8. **Moving Pivotal to Greenhopper**
   Linking tickets and commits to Pivotal is hard. Much easier to move on to Greenhopper. No hard feeling on moving to Greenhopper. Same concept as Pivotal, but Pivotal looks nicer. Same workprocess though.
   **AP**: Jerry will send an e-mail to the list to have have a final decision

9. **Next meeting**
   19 october, 14:00h CEST

10. **AOB**
    Sara wants to have comments on documentation and the documentation process. sara@sinodun.com
